

## Company History

Certified Parts Corporation (CPC) was founded in 1976 by James Grafft to meet the growing demand for obsolete replacement parts for outdoor recreational equipment. CPC strives to maintain hard-to-find “New-Old” replacement parts for out of production recreational vehicles such as snowmobiles, personal watercrafts, go-karts, mini cycles and more.

For more than 30 years, Certified Parts Corporation has been supplying OEM parts for vintage products and replacement parts to recreational and outdoor enthusiasts. In addition to OEM parts, CPC carries a wide variety of replacement parts for recreational vehicles through the vintage parts business. Our commitment and goal is to continue to expand our product lines based on the needs and demands of our customers.

Among the brands CPC provides Original Equipment Replacement parts for are Bridgestone and Indian motorcycles; Chris Craft wood-hulled boats and Eska outboards; Scorpion, Chaparral and Rupp snowmobiles; Surf Jet and Wet Bike personal watercraft, and many more.

In 2009, CPC purchased certain assets of TecumsehPower Company’s engine business, including manufacturing equipment and dies along with their parts inventory. Lauson Power Products, LLC was established to manage this part of the business and bring back the historical name of the engine line dating back to 1895. This was followed later that year with the acquisition of certain assets of Comet drives and Hoffco outdoor power equipment, again, along with their parts inventory. CPC is now the original parts source for these well-known brands.

In 2010, Lauson Power Products, LLC entered into an agreement with Liquid Combustion Technologies (LCT) for the manufacture, sale and service support of Lauson, Snow King and LCT branded engines. This partnership effectively re-introduces the Snow King and Lauson brands to the marketplace. The distributor and dealer network in place under TecumsehPower will provide service for all three brands of engines.

The Certified Parts team along with our distributors and dealers are committed to helping you with your current new equipment and restoring vintage products.
